 Shutter speed 30th
 ISO....400
 Image format...Canon Raw converted to jpg
 Focal Length 75mm
 Tripod...yes
 Time of day...6:00pm
 Artwork applied...none
 Lab output....8x10, 11x14,

Notes:

For this image, I had large windows out of camera range on the right. There was some ambient light there already, so I turned the Metz down one stop to F4, but kept the shooting aperture on my lens at F5.6. This allowed me to blend the flash with light coming in the window.

Notice bride's weight on the foot farthest from the camera.
