 Time of day....6:30 pm
 Artwork applied...vignette, saturation, blurred the sand.
 Lab output....40x60, 30x40

Notes:

Cancun Mexico, January 2006.

One of the reasons I love the Metz thyristor flashes so much is that they allow me to work really fast. It's a "set and forget" flash. Flash is placed on a lightstand, fired with a Pocket Wizard Radio slave. Flash is on auto.
