ISO....400

Image format...Canon Raw converted to jpg

Focal Length 50mm

Tripod...yes

Time of day...7:30pm

Artwork applied...blur added to background, darkened, sepia toned

Lab output....30x40, 11x14

### Notes:

I used what outdoor light there was to light the rim of the couple (notice light on the groom's shoulder and bride's veil) by placing them in the doorway. By turning her body more toward his, her body size shrinks, creating a much larger difference in body size.
